

## Immunization Requirements

**DTP, DTaP, Td:** 5 doses with the last dose being after the 4<sup>th</sup> birthday are required to enter kindergarten.

If the student has 4 doses and the last one was after the 4<sup>th</sup> birthday a 5<sup>th</sup> is not needed.

A Td booster is required to enter the 7<sup>th</sup> grade. This shot could be Td, TDaP, or DTP and is in addition to the 4 or 5 pre-kindergarten doses. If a student had a Td, TDaP, or DTP shot between 3<sup>rd</sup> grade and 7<sup>th</sup> grade (for an injury) that would count for their 7<sup>th</sup> grade booster.

**Polio:** 3 or 4 doses. If a student has 3 doses and the last one is after the 4<sup>th</sup> birthday they don't need a 4<sup>th</sup> dose. If a student has 4 doses regardless of the dates they don't need a 5<sup>th</sup> dose. (Our local public health said never 5 doses).

**MMR:** 2 doses regardless of the dates.

**Hepatitis B:** There is a 2 dose series and a 3 dose series. The student must have either 2 dates in the 2 dose boxes or 3 dates in the 3 dose boxes. It doesn't matter how far apart the dates are.

**Varicella (Chicken Pox):** The student must have 2 doses. Or have had the disease. Proof of the disease is a signature by the parent or guardian. An actual date is OK but not needed. This requirement is for K thru 12.
